Week 1-2 Report

Status: We successfully created an MVP starting from scratch, completing our goals for this sprint

Actions to Keep Doing: Continue velocity by adding new features. Maintain trunk-based development for continuous development and integration. Always put tasks on the scrum board so people know what others are working on so there are no duplicate tasks.

Actions to Start Doing: Make sure every team member git pulls before pushing new commits and avoid merge conflict issues.

Actions to Start Doing: Good communication matters in our case because four of us are in a difficult class, and can't put as much time into this class, so letting everyone know each other's respective situations is always a plus.

Work Completed: MVP achieved.

User Stories:

- 1) As a user, I want to see a deployed Cognize Screen [5]
- 2) As a user, I want to see an About Cognize Screen [1]
- 3) As a user, I want to show the total number of completed quizzes [2]
- 4) As a user, I want to see the username and profile on the profile screen [3]
- 5) As a user, I want to see the quiz page, start, in progress, and finished quiz [7]
- 6) As a user, I want to be able to fetch quiz data from Firestore [3]
- 7) As a user, I should be able to see the topics from Firestore [3]
- 8) As a user, I want to see a user profile in the top right corner, and clicking on this shows profile stats [4]
- 9) As a user, I want to be able to add new quizzes [7]

To Do Tasks: The ability to create custom quizzes and save them to the user's account. Social system, ability to add friends and view other profiles, etc.

- 1) Gamify app with points score for completion of quizzes [5]
- 2) Self-publication of quizzes [5]

- 3) Apple authentication [5]
- 4) Integrate to chatGPT [9]
- 5) Add Cognize logo to login screen [1]
- 6) Refine Cognize logo [1]
