Week 5/6 Report

Status: Make the app more accessible, and improve the user experience through new experiences and features. Focusing on creating a search bar along with the ability to add custom quizzes.

Actions to Keep Doing: Keep working on what we are doing, and know what we need to work on. Always put tasks on the scrum board so people know what others are working on and there are no duplicate tasks. Improved communication between the group members, so we know who can't work on what so that there's no tension between us. We enforced weekly meetings, which improved communication between us, so we knew what was going on in each others' lives, and we needed to work on it individually.

Actions to Start Doing: Obviously, just start doing work when we are supposed to, because, at this rate, there's not much that's being done. The app is mostly done, though, but it's unknown what else is even going to be added in the future. Some members of the group seem to be too busy with other things in their lives, but it's fine if we spread the work evenly among the rest of us.

Work Completed: Substring search of quizzes, number of quiz points earned, self-publication of quizzes,

User Stories:

- 1) As a user, I want to be able to search quizzes by a substring of the name instead of typing the prefix of the quiz topic (Joel) (3)
- 2) As a user, I want to be able to see the number of points I earned when I view my profile (Joel) (5)
- 3) As a user, I want to be able to be able to publish my quizzes (Abel) (5)
- 4) As a user, I want to see a more professional logo for the Cognize app (Jeffrey) (2)

To Do Tasks: The ability to create custom quizzes and be able to save them to the user's account. Social system, ability to add friends and view other profiles, etc.

- 1) Gamify the app with medals, rewards for completing the quizzes (Complete quiz -> gain 5 points) and then point aggregation (Joel)

- 2) As a user, I want to take quizzes with a free response or other formats other than just multiple choice quizzes (5)
- 3) As a user, when I get a quiz question wrong I want to be able to see an explanation of what I did wrong/ how to get the correct answer (using chatGPT or other systems) (Sohail) (7)
- 4) Apple authentication (Jeffrey)
- 5) Integrate to chatGPT - Sohail
- 6) Free Response Quiz Questions (Abel)
- 7) Apple Store Deployment (James)
- 8) Google Store Deployment (James)
- 9) Refine Cognize logo (Jeffrey)
