

Goal:

The Cognize app should improve user experience and accessibility with the app by including new features to promote user engagement with this app.

User Stories to be Completed:

- As a user, I want to see a deployed Cognize Screen (James) [5]
- As a user, I want to see an About Cognize Screen (Jeffrey) [1]
- As a user, I want to show the total number of completed quizzes (Joel) [2]
- As a user, I want to see the username and profile on the profile screen (Joel) [3]
- As a user, I want to see the quiz page, start, in progress, and finished quiz (James) [7]
- As a user, I want to be able to fetch quiz data from Firestore (Jeffrey) [3]
- As a user, I should be able to see the topics from Firestore (James) [3]
- As a user, I want to see a user profile in the top right corner, and clicking on this shows profile stats (Joel) [4]
- As a user, I want to be able to add new quizzes (Abel) [7]
