Cognize Scrum Report (Week 9-10)

James Tenant
Joel Sojan
Jeffrey Yue
Sohail
Abel Asrese

Status: We successfully created an MVP starting from scratch, completing our goals for this sprint

Actions to Keep Doing: Continue velocity by adding new features. Maintain trunk-based development for continuous development and integration. Always put tasks on the scrum board so people know what others are working on and there are no duplicate tasks.

Actions to Start Doing: Make sure every team member git pulls before pushing new commits and avoid merge conflict issues.

Actions to Start Doing: Good communication matters in our case because four of us are in a difficult class, and can't put as much time into this class, so letting everyone know each other's respective situations is always a plus.

Work Completed: Medals are included next to the user profile on the profile page after completing a certain number of quizzes.

Goal:

The Cognize app should improve user experience and accessibility by including new features to promote user engagement with this app.

User Stories Completed:

- As a user, I want to be able to see awards for my progress towards learning using Cognize with medals/awards on my profile (Joel) (5)

User Stories in Progress:

- As a user, I want to take quizzes with a free response or other formats other than just multiple choice quizzes (5)
- As a user, when I get a quiz question wrong I want to be able to see an explanation of what I did wrong/ how to get the correct answer (using chatGPT or other systems) (Sohail) (7)

- As a user, I want to see the app deployed on the Google/Apple Play Store for mobile users (James) (5)
