Week 3-4 Report

Status: Updating the Multiple Choice Quiz App with better UI (search bar, updated About page), UX (improved animations, cross-platform display consistency)

Actions to Keep Doing: Continue velocity by adding new features. Maintain trunk-based development for continuous development and integration. Always put tasks on the scrum board so people know what others are working on and there are no duplicate tasks.

Actions to Start Doing: Make sure every team member git pulls before pushing new commits and avoid merge conflict issues. Update the scrum board with finished tasks to avoid implementing existing features. Maintain communication. Maintain transparency of tasks finished/ tasks that need more time to finish.

Work Completed: Screen Stretching, Login Page, Search Page, Button animations, UI transitions

User Stories:

1) As a user, I want to access the Search Bar for looking up Quizzes (Joel) [5]
2) As a user, I want to see an Improved Login Page (with more details) (Jeffrey) [3]
3) As a user, I want to adjust screen size for Screen Stretching on IOS/Android devices (James) [3]
4) As a user, I want to see additional details for the About page (Jeffrey) [2]
5) As a user, I want to adjust button animations (James) [3]

To Do Tasks: The ability to create custom quizzes and save them to the user's account. Social system, ability to add friends and view other profiles, etc.

1) Gamify app with points score for completion of quizzes (Update points) (Complete quiz -> gain 5 points) and then point aggregation (Joel)
2) Search Bar - Searching by Key Words (Joel)
3) Search by category (Joel)
4) Self-publication of quizzes (Abel)
5) Integrate to chatGPT (Sohail)
6) Free Response Quiz Questions

7) Apple Store Deployment
8) Google Store Deployment (James)
9) Refine Cognize logo (Jeffrey)
